SKILLS

Java | Selenium | Amazon Web Services | Linux | Github | Jenkins | Python | CI/CD | ReactJS | Docker

CERTIFICATES

AWS Certified Solutions Architect Associate ⧉
Able to strategically design well-architected distributed systems that are scalable, resilient, efficient, and fault-tolerant.

AZ-900: Microsoft Certified: Azure Fundamentals ⧉
Demonstrated foundational level knowledge of cloud services and how those services are provided with Microsoft Azure.

AZ-305: Designing Microsoft Azure Infrastructure Solutions ⧉
Validates the skills and advanced experience and knowledge of IT operations, including networking, virtualization, identity, security, business continuity, disaster recovery, data platforms, and governance.

PROFESSIONAL EXPERIENCE

Release Engineer, *Acronis SCS* — Oct 2022 – Jan 2024, Remote

- Collaborated with security and compliance teams to incorporate FIPS 140-2 requirements into the build and release pipelines, ensuring secure handling of sensitive data.
- Monitor and troubleshoot build and deployment failures, identifying and resolving issues in a timely manner to ensure smooth and reliable software releases.
- Coordinated with cross-functional teams, including developers, quality assurance, and security, to streamline release cycles and ensure efficient deployment processes.
- Maintained documentation and evidence of FIPS 140-2 compliance, including configuration settings, certificates, and audit logs.

Release Engineer, *Wells Fargo* — Dec 2020 – Sep 2022, San Antonio, TX

- Participate in the release cycle which involves Performance, Development, UAT, and Production environments.
- Participate in meetings with Technology, stakeholders to identify and mitigate potential risks associated with the monthly releases.
- Documented software release management procedures and reviewed with stakeholders prior to deployment per release.
- Resolve environment issues with development teams and update/create environment tickets in JIRA for documentation and using tools such as Splunk and Urban Code Deploy to find root cause.
- Merged release branches to the respective master branches after the production release and resolved the conflicts raised during the merge.
- Experience in Blue-Green deployment model by utilizing proprietary in house management console,Urban Code Deploy, and AppViewX F5.
- Updated and maintained project dependencies using pom.xml in Maven, ensuring consistent builds and seamless integration with updated libraries.

Automation Test Engineer, *Wells Fargo* — Sep 2019 – Nov 2020, Charlotte, NC

- Identify manual script candidates for smoke and regression test suites and using Selenium, Java, TestNG, and Jenkins/Maven to convert them for the automation suite.
- Prepared project test plans, test estimations and approach strategies.
- Worked closely with Business-analyst and developers for successful releases.
- Work with a global team spread across tech hubs in multiple geographies and time zones.
- Exercise agile methodology by collaborating within kanban and scrum teams.
- Led the backlog grooming sessions to discuss the Epics, features and stories within the scrum team.

Automation Test Engineer, *Synechron Inc.* — Jan 2019 – Sep 2019, Charlotte, NC
- Collaborating closely with developers to enhance testing through indepth understanding of the system and source code under test.
- Using Java as well as numerous testing technologies (Selenium, TestNG, and internal frameworks) to design, build, and maintain test scripts and suites.
- Contributed to improvements in the UI automation framework that is used to test a mission critical application for mortgage and lending applications.
- Help to onboard 3 new QA team members and train them on internal frameworks as well as partial Java training.
- Crafted confluence documents around the automation framework and troubleshooting tips.

- Participated as a member of the Innovation Team to help provide ways to improve efficiency in existing and future projects.

🗀 PROJECTS

TieriFlicks, *Movie App and Tier List* ⧉
Please check out my app on the Apple iOS App Store =)

Additional projects available at https://github.com/kaisdewani

The Gist
- A website built using ReactJS to summarize articles using a text analysis API.

StarTrivia
- iOS application created using swift to show Star Wars facts in a fun and immersive way by utilizing the SWAPI API.

Jokes For Joy, ReactJS
- Website to generate dad jokes using ReactJS by using API calls.

Quick Connect
- React on Rails application to make sharing contact information with someone quick and easy by leveraging Twilio API.

🎓 EDUCATION

Full Stack Web Development, *Wyncode Academy*   Jul 2018 – Sep 2018
- Full Stack Web Development technical bootcamp.   Miami, FL

Associate of Science, *Palm Beach College*   Aug 2013 – May 2015
- Completed credits and to fulfill requirements towards a Bachelor of Science at Florida Atlantic University.   Boca Raton, FL
